

Clear blemishes with this 5% benzoyl peroxide spot treatment including gluconolactone to prevent dryness and irritation. Essential for those with acne.

before

Condition: acne with post-inflammatory hyperpigmentation.*

after three months

Solution: received a series of PCA Peel® with Hydroquinone treatments and used The Acne Control Solution and Pigment Gel® daily.*

*Photos not retouched.

Active ingredient:

Benzoyl Peroxide (BPO) 5% – penetrates pores to eliminate existing acne lesions and prevent future breakouts.

Key ingredients:

Gluconolactone – a gentle antioxidant polyhydroxy acid (PHA) that is calming, moisturizing and promotes a clear complexion.

Lactic Acid – an alpha hydroxy acid (AHA) naturally found in milk and sugars. It is part of the skin's natural moisturizing factor (NMF) and moisturizes the skin.

Grape Seed Extract – a good source of the essential fatty acid (EFA) linoleic acid.

Tea Tree Leaf Oil – promotes a clear complexion.

Directions for use: After cleansing and toning, spot-treat affected areas with a smooth layer. It is not for all-over facial use. Follow with the appropriate PCA SKIN® broad spectrum SPF product in the daytime and moisturizer in the evening.
