Calming Balm is a versatile treatment enhancement that can be used during any protocol to add nutritive and calming benefits to the skin. Calming Balm incorporates the advanced soothing botanicals bisabolol, allantoin and aloe with vitamin E, and mushroom extracts for antioxidant benefits.

Key ingredients:
- **Bisabolol** – is one of the principal compounds found in chamomile. It is thought to be largely responsible for chamomile’s soothing effect on the skin.
- **Allantoin** – is an antioxidant that soothes the skin.
- **Aloe Vera** – is a purifying ingredient best known for its softening and soothing benefits.
- **Vitamin E (Tocopherol)** – is a fat-soluble antioxidant and emollient ingredient.
- **Cordyceps Sinensis Extract** and **Trametes Versicolor Extract** – are mushroom-derived soothing and calming ingredients.
