

**Sensi Peel®** is formulated as a unique peeling option for all patients, including those with highly sensitive skin. This gentle 6% TCA solution will improve surface texture and brighten the skin while helping to promote an even skin tone. This multi-faceted and skin-brightening treatment is an excellent option for sensitive skin and higher Fitzpatrick skin types.

before

Condition: pseudofolliculitis barbae (ingrown hairs).\*

after

Solution: received four microdermabrasion with Sensi Peel® treatments, and used Blemish Control Bar (prior to shaving) and The Skin Care Solution for Men twice daily over a two-month period.\*

\*Photos not retouched.

**Key ingredients:**

**Lactic Acid (12%)** – is an alpha hydroxy acid (AHA) naturally found in milk and sugars. It is part of the skin's natural moisturizing factor (NMF) and moisturizes the skin.

**Trichloroacetic Acid (TCA) (6%)** – is most commonly used as a superficial and medium-depth peeling agent to improve the appearance of fine lines and wrinkles.

**Kojic Acid** – helps promote an even skin tone.

**Azelaic Acid** – helps promote a clear complexion and even skin tone.

**Arbutin** – is an antioxidant that also helps promote an even skin tone.

**L-Ascorbic Acid (Vitamin C)** – is an antioxidant and MMPi that is the only bio-available form of vitamin C for the skin. It minimizes the appearance of fine lines and wrinkles while promoting an even skin tone.
