

# Dual Action Redness Relief

Improve skin's barrier function while reducing sensitivity and redness with this restorative treatment including niacinamide, ceramide, and protective agents.

## Key Benefits

- ✓ Starts reducing redness and inflammation on contact with the skin
- ✓ Improves the skin's barrier function for long-term relief from redness and sensitivity
- ✓ Calms and soothes compromised skin, even after professional treatments
- ✓ Uses the time-released OmniSome™ delivery system to carry skin-improving ingredients deeper into the skin over a period of 10 hours

## Key Ingredients

- + **Niacinamide** – a potent, yet calming antioxidant that delivers multiple important benefits to the skin. It helps to reduce transepidermal water loss (TEWL) and improve barrier function. This is critical for healthy, bright skin. Additionally, it helps reduce redness, skin yellowing, and promotes an even skin tone.
- + **InflaShield™** – a patented cosmetic ingredient shown to reduce the sub-clinical inflammation that contributes to aging.
- + **Dimethyl Sulfone and Silybum Marianum Fruit Extract** – work synergistically to reduce redness, increase hydration, and soothe reddened skin.
- + **Panthenol** – hydrates the skin.
- + **Bisabolol** – one of the principal, active compounds found in chamomile; this ingredient contains MMPi properties to calm and soothe the skin while attracting and retaining moisture.
- + **Ceramide NP** – supports the renewal of the skin's natural protective layer and forms an effective barrier against moisture loss; improves long-term moisturization and protects skin from external offenders.

### Skin Type

- Dry
- Oily
- Combination
- Normal
- Sensitive

### Directions for use \*🌙

After cleansing, apply to the entire face and neck in the morning and evening for barrier repair and redness reduction. Follow with the appropriate **PCA SKIN®** broad spectrum SPF product in the daytime and moisturizer in the evening.

Retail: net wt 1 oz | Trial: net wt 0.25 oz

### Ingredients

Water/Aqua/Eau, Isododecane, Cyclopentasiloxane, Niacinamide, Dimethicone, Glycerin, Polyglyceryl-10 Dioleate, Tapioca Starch Polymethylsilsesquioxane, Pentylene Glycol, Ammonium Acryloyldimethyltaurate/VP Copolymer, Cetearyl Alcohol, Dimethyl Sulfone, Polysilicone-11, Caprylic/Capric Triglyceride, Panthenol, Glyceryl Stearate, PEG-100 Stearate, Coco-Caprylate/Caprate, Silybum Marianum Fruit Extract, Phenoxyethanol, Bisabolol, Tocopheryl Acetate, Hexyldecanol, Butylene Glycol, Sodium Polyacrylate, Caprylyl Glycol, Ethylhexyl Stearate, Ceramide NP, Xanthan Gum, Chlorphenesin, Citrus Grandis (Grapefruit) Peel Oil, Sodium Citrate, 4-t-Butylcyclohexanol, Trideceth-6, Disodium EDTA, Decyl Glucoside, Cetylhydroxyproline Palmitamide, Brassica Campestris (Rapeseed) Sterols, Hydroxyphenyl Propamidobenzoic Acid, Stearic Acid, Zingiber Officinale (Ginger) Root Extract, Aminomethyl Propanol.

## Clinical Information

In a study completed with five patients using the product with basic support products over a seven-week period, the investigating clinician reported 100% of patients showed positive changes in their skin with 90% of patients showing significant improvement in erythema and barrier function.

## Conclusion

Studies demonstrate that **Dual Action Redness Relief** provides visible improvement in skin redness and impaired barrier function. All patients showed positive improvement in their skin. No adverse events were noted.

### Pro Tips

Use this product last, just before your broad spectrum SPF or nighttime moisturizer. Its thicker consistency will yield better results when used towards the end of a regimen.

For those with less dry skin, **Dual Action Redness Relief** could provide enough hydration to also act as a nighttime moisturizer.

**Dual Action Redness Relief** can serve as a soothing addition to professional treatments for those who experience a lot of heat and sensation after a chemical peel application. In a treatment, apply just before the moisturizer.
