

Hyaluronic Acid Lip Booster

Achieve softer, fuller lips with this hydrating, daily-use product designed to immediately enhance moisturization and stimulate collagen production for long-term volume-increasing benefits.

Key Benefits

- ✓ Ultra Filling Spheres™ instantly hydrate and plump the lips without irritation
- ✓ Powerful peptides stimulate collagen production to reduce lip lines
- ✓ An advanced ingredient blend improves long-term lip hydration, volume, and softness

Key Ingredients

- + **Ultra Filling Spheres™** – an advanced ingredient blend that combines sodium hyaluronate and konjac root to instantly hydrate and increase lip volume without irritation. The dehydrated microspheres remain stable in an anhydrous base until they interact with water in the lips. Their dehydrated state allows them to penetrate the epidermis, and once they come into contact with water, they swell and draw moisture from the dermis to the upper layers of skin in the lips, creating an instant lip-plumping effect.
- + **Palmitoyl Tripeptide-38 and Portulaca Pilosa Extract** – a collagen-stimulating peptide and botanical blend that instigates the synthesis of multiple extracellular matrix proteins to minimize the appearance of fine lines and wrinkles while increasing lip volume.
- + **Palmitoyl Tripeptide-1** – a peptide that helps increase collagen and GAG production to moisturize and increase lip volume.
- + **Tocopherol (Vitamin E)** – a fat-soluble antioxidant vitamin and emollient ingredient.

Before

After three minutes

Condition: Lip lines and dehydration.* **Solution:** Hyaluronic Acid Lip Booster.
